

CLUB ON – Membership Module

The Membership Management assures accurate and auditable club billing no matter how you bill your members. Yet the Membership Management module is far more in that it allows you to effectively communicate with and service your membership. The system tracks all activity in and around the facility and provides that information to you in a timely and accurate basis. Full transactional history with detail drill down provides for accountability of every member charge, reservation, contact, and notes. Easily set up automatic recurring billing for certificates, initiation fees, dues, fees, clubs, and minimum spending programs.

The screenshot displays the 'Member Account' window with the following details:
